## Introduction

**Bloglive** is a powerful mobile blogging application that enables you to update your online blog directly from your mobile phone. With Bloglive, updating your blog while you're on the go is as easy as writing an SMS. It runs on your smartphone and allows you to write new blog entries, publish them on your blog, and edit them afterwards or delete them.

## ***Main Features***

- Supports multiple blog accounts
- Efficiently create, edit and delete posts
- User library support for frequently used words and phrases
- Advanced text editor: Easily insert text URL, online image in your posts, without having to enter any HTML codes
- Supports major online mobile systems including the Blogger, WordPress, Movable Type, TypePad, and MetaWeblog API for compatibility with a most blog sites
- And there is more at [http://imoblife.com/bloglive\\_bb.html](http://imoblife.com/bloglive_bb.html)

## ***Minimum Requirements***

Before you install and run Bloglive, please make sure your BlackBerry device meets all of the follow requirements:

- BlackBerry OS 4.0 or later (OS 4.1 recommended.)

## ***Demo Version***

The Demo version has all the features of the Full version except for the following:

- 10 times usage limitation

## ***Getting Started***

The Frequently Asked Questions page for Bloglive may contain more recent information and trouble shooting tips, see <http://www.imoblife.com/FAQ.html>.

## ***Installing Bloglive***

There are 2 easy ways to install Bloglive. If you received the Bloglive software package, you can install it with the BlackBerry Application Loader. The instructions regarding the installing procedures can be found in the BlackBerry User Guide. This will usually require a PC and a USB data cable (or Bluetooth) between the PC and your BlackBerry device.

Another alternative is to download and install the Bloglive demo version from iMobLife's web server directly to your BlackBerry device. This method requires a functioning BlackBerry Browser running on your device. Note that some service providers (e.g. Rogers) intentionally disable this feature. Please check with your service provider if you are not sure.

## With Application Loader

The procedures to install Bloglive with the Application Loader are:

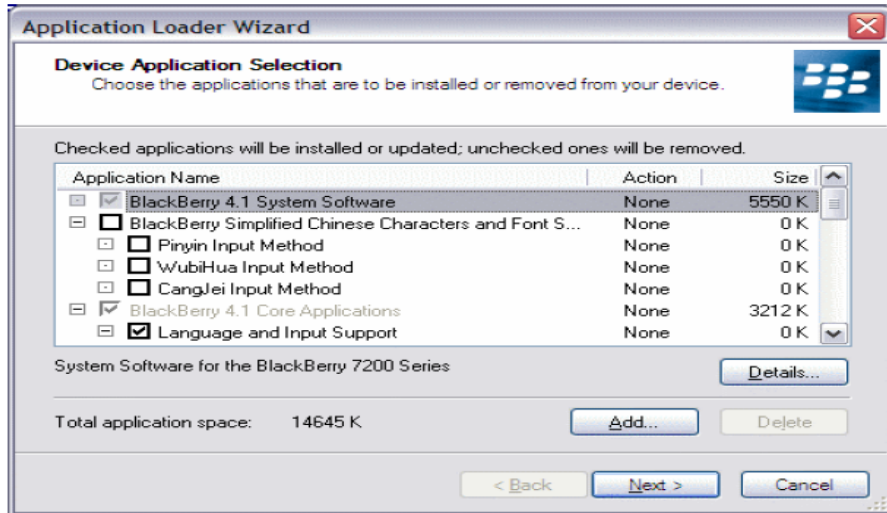

- Start the BlackBerry Desktop Manager.

- Connect your BlackBerry device to your PC or laptop. This is usually done by connecting the USB cable or through Bluetooth (if supported.)
- Select the Application Loader.

- Select "Next >".

- Select "Add...", Find and open the "Bloglive.alx" file.
- Select "Next >".
- Select "Finish" to complete the installation.

## Over the Air (OTA)

The procedures to install Bloglive over the air (OTA) are:

- Start up the BlackBerry Browser.
- Enter the web address:  
[http://www.imoblife.com/download/bloglive\\_ota/bloglive.jad](http://www.imoblife.com/download/bloglive_ota/bloglive.jad)
- Follow the instructions to download and install the Bloglive demo version.

## Running Bloglive

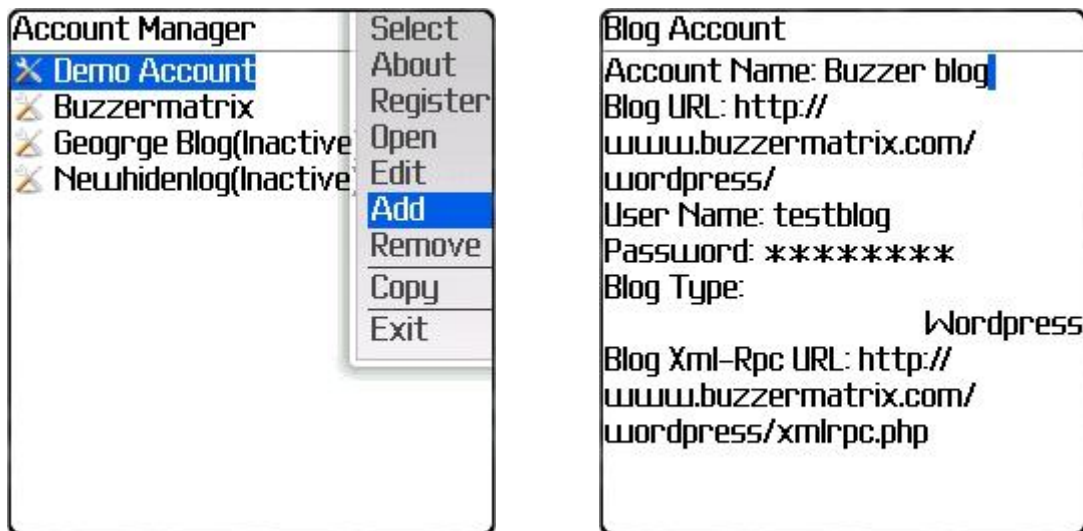

Select Bloglive icon in the main menu to start Bloglive.

## Main Window

## Create Blog Account

By selecting "Add" option in the main menu of Bloglive, you can start to add your blog account into Bloglive. You will need to input the Account Name, Blog URL (the URL of your blog, i.e. <http://www.buzzermatrix.com>), User Name, Password, Blog Type (i.e. MovableType, MetaWeblog, Blogger or WordPress), and Blog Xml-Rpc URL (i.e. <http://www.buzzermatrix.com/xmlrpc.php>). If you are not sure about how to input info into the related areas, you can refer to "Demo Account" in the blog account list.

After you have filled each field with your blog's related info, you should click "Activate" option in the main menu to activate your blog. By activating your blog, Bloglive will check online and verify whether your blog is live. If your blog is live, Bloglive will notify the blog (or blog list) has been verified. You only need to select and confirm the blog to continue. Otherwise, if Bloglive finds your blog is not live any more, it will return an error message. Your blog will remain inactive until you correctly activate it.

## Blog Manager

After activating your blog, you can enter "Blog Manager". Here you can find the directories of Drafts and Published articles. You can also write a new article by selecting the "New Article" option on the list.

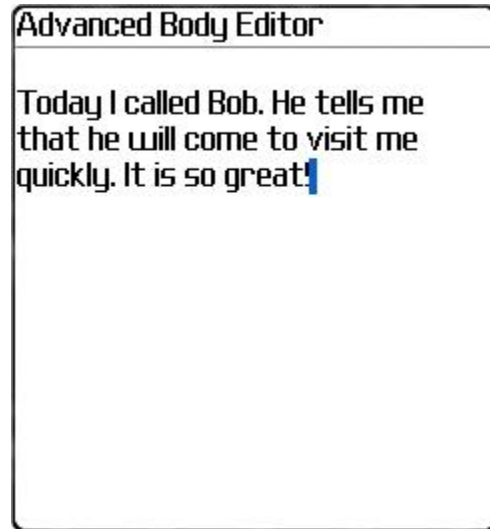

## Write Article with "Advanced Body Editor"

When you are writing the new article, you can enter text directly into the "Body" area or choose to write your article with the "Advanced Body Editor", which will offers you some advanced features including "User Library", "Text URL" and "Image URL" composer, etc.

**Blog Entry**  
Title: I Love Blogging  
Body:  
Today I called Bob. He tells me that he will come to visit me quickly. It is so great!

**Advanced Body Editor**  
Today I called Bob. He tells me that he will come to visit me quickly. It is so great!

## *User Library*

In the "User Library", you can enter and save some of your frequently used words and phrases. Then you can insert them into your article directly from the "Advanced Body Editor".

**Library**  
♦ I am at a meeting.  
♦ See you later!  
♦ The confrence time is at 8:00 AM.  
♦ It is my great pleasur to help.

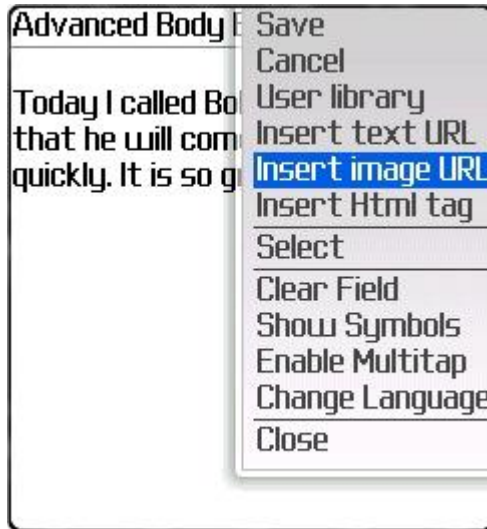

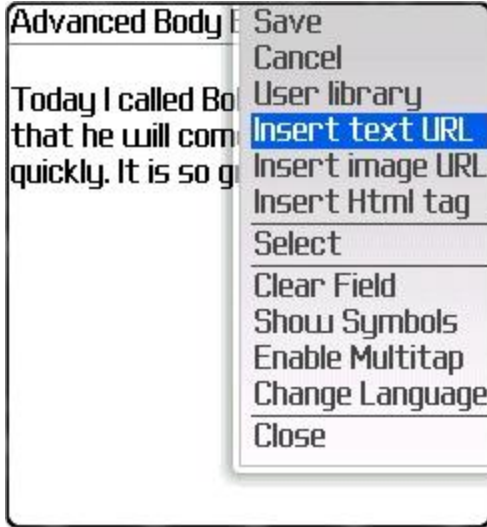

**Library**  
♦ I am at a meeting.  
♦ See you later!  
♦ The confrence tim AM.  
♦ It is my great pleas

- Select
- New entry
- Back
- Edit
- Remove
- Open
- Copy
- Close

### ***Insert Text URL & Image URL***

By selecting "Insert Text URL" or "Insert Image URL" option in the main menu of "Advanced Body Editor", you can quickly insert a web link or an online image into your article. Bloglive allows you to compose articles without having to enter any HTML codes

### ***Insert HTML tag***

Bloglive also enables you to quickly insert frequently used html tags into your article with its "Insert HTML tag" option. You can choose to enter the html tag manually or select it directly from the list.

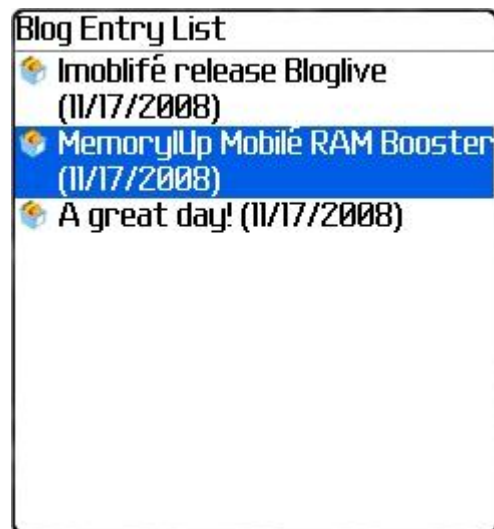

## "Draft" & "Published" Directory

### *"Draft" directory*

If you have not finish writing a new article or want to publish it later, you can save the article in the "Draft" directory. Later, you can enter the "Draft" directory and edit the article whenever you want.

### *"Published" directory*

After you have successfully published your article, the article will be moved into the "Published" directory. There you can review the article whenever you want.

By selecting the "Configure" option in menu, you can also set the maximum number of records that can be saved in "Draft" & "Published" Directory.
